

Brackets

Lighting Solutions

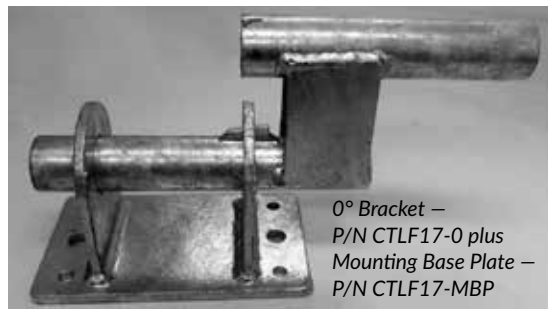

Bracket features

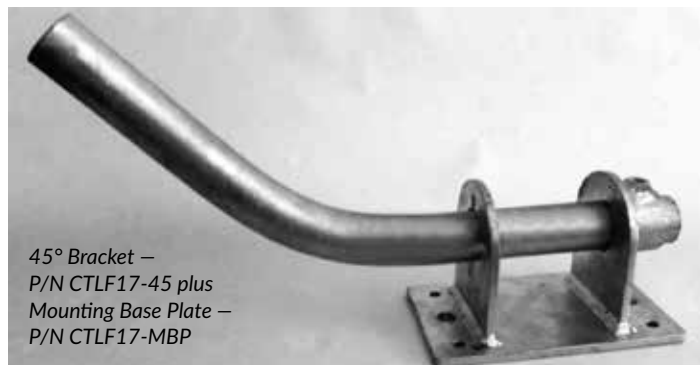

The range of brackets are designed to enable easy fitting which require only basic hand tools and no welding to further speed up installation. While sharing a common base across the range there a number of arms available for use with the base in various angles from 90°, 45°, 22.5° and 0°.

The base features a range of mounting options from 12mm to 8mm mounting holes and the ability of the arm to be rotated through 360° to ensure maximum flexibility. A 32mm threaded entry makes termination of the conduit or cable a snap.

The nominal 34mm O.D. allows any standard light fitting to be mounted - while a heavy duty galvanised finished ensure years and years of trouble free service.
